PROPAGATION

CALIBRACHOA BLOOMTASTIC

Calibrachoa x hybrida

TRAY & ROOTING

Form	Vegetative Cutting (URC)
Rooting Hormone?	Yes
Tray Size	
Plants Per Cell	1
Days In Mist	8-12
Wks. From Stick To Transplant	4
Propagation Pinch?	No
Weeks To Pinch	N/A

FERTILITY

Fertilize Through Mist?	50-75ppm N
Fertilizer Rate	100-150ppm N
EC Range	Moderate: (2.0-3.5 mS via SME)
pH Range	5.2-5.6

TEMPERATURE

Average Soil Temp	21-24°C
Average Air Temp (Day)	21-24°C
Average Air Temp (Night)	20-22°C

IRRIGATION

Irrigation Frequency	Level 3: Keep media moderately moist with mild dry cycles
----------------------	--

LIGHT

Daylength Neutral?	Yes
Supplemental	None
Benefits From Shade?	No

POTENTIAL DISEASES

Botrytis
, Pythium
, Rhizoctonia

POTENTIAL PESTS

Thrips, Fungus Gnats, Aphids

PGR SUGGESTIONS

- Ethephon
- Daminozide

CULTIVAR LIST

Rose Quartz, Serenity

TIPS

- Good soil to stem contact is extremely important for Calibrachoa rooting. If using a dibble, make sure the dibble hole is not too large for the cutting. After sticking, water the cuttings uniformly to help “seat” them in the soil media.
- Mist should be reduced as cuttings callus and roots form. Excessive misting results in iron-deficient chlorotic foliage and increases disease pressure.
- An acidifying fertilizer will help maintain a lower pH which Calibrachoa requires.

ANNUAL
FINISHING

CALIBRACHOA BLOOMTASTIC

Calibrachoa x hybrida

CONTAINER SIZE	PLANTS PER POT	TRANSPLANT TO FINISH (WEEKS)
10-12 cm	1	4-8
13-15 cm	1-2	6-10
15 cm and up	2-3	8-15

FERTILITY	
Fertilizer Rate	200-250 ppm N
EC Range	High: (3.5-5 mS via SME)
pH Range	5.2-5.6

TEMPERATURE	
Day Temperature	20-24°C
Night Temperature	18-23°C

IRRIGATION	
Irrigation Frequency	Level 3: Keep media moderately moist with mild dry cycles

LIGHT	
Daylength Neutral?	Yes
Optimum Light Level	5,000-9,000 fc (53,800-96,900 lux)
Supplemental	None
Benefits From Shade?	No

PINCHING	
Finishing Pinch?	Optional
Transplant to Pinch (days)	7-14

POTENTIAL DISEASES
Botrytis, Pythium, Rhizoctonia

POTENTIAL PESTS
Thrips, Fungus Gnats, Aphids

PGR SUGGESTIONS
<ul style="list-style-type: none">• Daminozide• Paclobutrazol

TIPS

- An acidifying fertilizer with iron is recommended.
- If new growth is yellowing, check pH and iron levels; the PH may be too basic causing an iron deficiency. If mature leaves are yellowing: check EC, N, and magnesium levels. They may be too low.
- Lower PGR rates are necessary in northern production areas with cooler growing conditions while higher rates may be required in southern, warmer production areas to achieve similar results. Providing high light, cool temperatures and a negative DIF also helps reduce stretch.
- High ammonia concentration in the soil can lead to excessive vegetative growth. This is common when plants have been over-fertilized in low light or low temperature conditions.
- Young plants should be pinched prior to transplant to reduce stretch and increase basal branching. Depending on finish size of container, an additional pinch can be helpful but not necessary if growing in optimal conditions.

FEATURES AND BENEFITS

CALIBRACHOA BLOOMTASTIC

Calibrachoa x hybrida

KEY INFORMATION

Primary Common Name	Calibrachoa
Consumer Watering Instructions	Keep soil evenly moist, but not saturated.
Bloom Time	Blooms Early Summer to Early Autumn
Exposure	Full Sun to Part Sun
Height	36-41 cm
Garden Spacing	41-46 cm

DESCRIPTION

Bloomtastic is a unique pastel series of Calibrachoa positioned as the most vigorous Calibrachoa line offered by Dümmen Orange.

CONSUMER APPEAL

- Versatile in hanging baskets, containers, and even landscape applications.
- The fabulous flower-power and delightful colors of our Calibrachoa easily explain why it is a staple at many garden centers.
- Easy to care for with little maintenance and no deadheading.

GARDEN ATTRIBUTES

- Extremely heat and humidity tolerant.
- Pushing out absurd amounts of color, our Calibrachoa are no-brainers for gardeners who want to add flare to a sunny spot.

NATIVITY

Of hybrid origin: Calibrachoa genus native to South America.
