DESCRIPTION

Great new series with five vibrant colors and matching habit. Perfect summer perennial with a long bloom season.

CONSUMER APPEAL

- The breeding work that has been completed on these Penstemon is truly astounding. Gigantic vibrant blooms placed tightly together on an extremely compact plant create value for the grower, retailer, and gardener.
- The flowers of beardtongue are attractive to butterflies and bees while the ripe seedpods are a source of food for birds.

GARDEN ATTRIBUTES

- Penstemon can make wonderful cut flowers, their large panicles have an unignorable look in solo or mixed bouquets.
- Sprinkle throughout your sunny perennial gardens or mass plant for a bit of drama in the garden. Penstemon also fit nicely in to cottage gardens, naturalized areas, and pollinator gardens.
- Prefers soils that are either on the dry side or slightly moist, but never wet or saturated. Poorly drained soils should be avoided.
