

Snowstorm+
EVERY DAY IN ANY WAY!

Imagine a **Rose so perfect**, with an intense white colour and an incredibly strong vase performance. Are you ready to roll out **your creative excesses**?

We understand that you as a florist got 99 challenges, but we ensure **SnowStorm+ ain't one!**

The proud growers behind SnowStorm+

SnowStorm+ are grown in Kenya and Ethiopia. This African Rose is becoming more popular at florists and specialists. No wonder why we call SnowStorm+ the everyday rose. We're proud to introduce you to these high quality growers.

Spring

When the days are getting longer and the sun becomes stronger you now Spring is on its way! Enjoy a soft coloured vase with SnowStorm+ and put it in front of the window. It's making you look outside more often and stimulates your happy feelings.

Summer

Extend your living with a bunch of SnowStorm+ at your garden table. When the days are soft, SnowStorm+ blends easily with your garden and guarantees a true garden party. Try SnowStorm+ in another perspective and see how the snow white petals are in a strong contrast with the blue sky!

Winter

It feels like home for SnowStorm+ during Winter. This Rose is truly like a Snowstorm in your vase, all covered in white, which gives you a fresh and wealthy look.

Autumn

Every season has its charm, although when Autumn starts we need to get used to less sun and more candle lights. Make it cosy and use some light colours into your interior for a soft Autumn launch. SnowStorm+ keeps the magic alive when it continues to bloom and soft tones fill up the room.
